

Animal Runners

Can you run as fast as a rabbit? The table shows the top speeds of some animals. The speeds are given in mph, or miles per hour.

1. Use the data in the table to make a bar graph.

Animal	cheetah	chicken	elephant	human	lion	rabbit
Speed (in mph)	70	9	25	28	50	35

2. Label the vertical line at the far left *Animals*. Write the names of the different animals on the lines to the left of the grid.
3. Label the horizontal line below the grid *Speed (in Miles Per Hour)*. Let each box on the grid stand for 10 mph. Starting at the left with 0, number the short horizontal lines.
4. Draw a bar to show the speed of each animal. Give the graph a title.
5. Can a human run as fast as any of these animals? Which? _____
