

Decimal Place Value

A grid can be used to show tenths and hundredths. To show 0.3, you would shade 3 out of the 10 parts.

0.3
3 out of 10 parts are shaded.

To show 0.30, you would shade 30 out of the 100 parts.

0.30
30 out of 100 parts are shaded.

One part of the hundredths grid can be compared to a penny, since one part of the grid is equal to 0.01 and a penny is equal to one hundredth of a dollar.

Tenths and hundredths are related. In the above examples, 3 tenths or 30 hundredths of the grids are shaded, or 0.3 and 0.30. These numbers are equal: $0.3 = 0.30$.

Write the word form and decimal for each shaded part.

Shade each grid to show the decimal.

5. **Number Sense** Write three numbers between 2.02 and 2.2.
