

Solving Addition and Subtraction Equations

For **1** and **2**, solve for each .

<p>1. $w - 8 = 26$</p> <p>$w - 8 + \square = 26 + \square$</p> <p>$w = \square$</p>	<p>2. $r + 11 = 19$</p> <p>$r + 11 - \square = 19 - \square$</p> <p>$r = \square$</p>
---	---

In **3** through **14**, solve each equation.

3. $k + 4 = 21$	4. $j - 7 = 6$	5. $q - 2 = 39$
6. $h + 350 = 450$	7. $b - 44 = 6$	8. $t + 52 = 61$
9. $e - 28 = 44$	10. $n + 63 = 108$	11. $p + 7 = 111$
12. $s + 25 = 64$	13. $c - 71 = 18$	14. $z - 13 = 13$

- 15.** Ben walked 8 miles to a friend's house and 4 more miles to the park. Write and solve an equation to show how many miles Ben walked in all.

- 16.** Carla made 27 gift baskets. She has given 8 away. Which equation shows how to find the number of gift baskets Carla has left?

A $8 + 27 = b$ **B** $b + 27 = 8$ **C** $8 + 27 = b$ **D** $27 - 8 = b$

- 17. Writing to Explain** Roger knows how many keys a piano has. He knows that some of the keys are broken. How can he find the number of keys that work?
