

# Customary Measures

## Customary Units of Length, Weight, and Capacity

You can use customary units to measure length, weight, and capacity. You can use the chart to change a measurement from one unit to another.

**Length**

1 ft = 12 in.

1 yd = 3 ft

1 mi = 5,280 ft

**Weight**

1 lb = 16 oz

1 T = 2,000 lb

**Capacity**

1 tbsp = 3 tsp

1 fl oz = 2 tbsp

1 c = 8 fl oz

1 pt = 2 c

1 qt = 2 pt

1 gal = 4 qt

To change larger units to smaller units, multiply.

5 mi =  ft

*Think:* 1 mi = 5,280 ft

$5 \times 5,280 = 26,400$

5 mi = 26,400 feet

To change smaller units to larger units, divide.

72 fl oz =  c

*Think:* 1 c = 8 fl oz

$72 \div 8 = 9$

72 fl oz = 9 cups
