

Regions and Sets

The top number, the numerator, tells the number of equal parts described. The bottom number, the denominator, tells how many equal parts there are in all.

$\frac{2}{3}$ of the circle is shaded.

$\frac{3}{5}$ of the set is shaded.

Write a fraction for the part of the region that is shaded.

Shade in the models to show each fraction.

7. **Reasoning** Tara says that $\frac{1}{2}$ of a salad is always the same amount. Lynn says that it could be different amounts, depending on how large the salad is. Who is correct? Why?
